

# #11 BLITZ UPDATES

*BlitzCreek Robotics*

## ➤ State Championship

At the Michigan State Championship last weekend, our team unfortunately placed last on our field. Our robot suffered a malfunction with a wire connection, and it was fixed, but not in time to rank higher. We were not selected for an alliance, and couldn't compete further. We also did not win the Engineering Inspiration award, so we did not qualify for the Houston World's Championship.

## ➤ Season's End

Our robotics season is officially over, with no more competitions to attend.

Our team will host and hopefully attend a few off-season events, so we will not be idle through the off-season.
